J. Frank Chaplin, Samuel H. He asked if the state of the property of the Watch Hill first district, were presented to make a legal grade in Buy street, or if one is to be established was to be established, and he said he was to be established, and the said he case would be continued for one week and that bonds of solony to the street more presentable, sithough the street of the street more presentable, sithough to do anything in an outname of the street more presentable, sithough to do anything in an outname of the street is the street of the street more presentable, although to the street more presentable, although the street of the street more presentable

Mr. Phelps said he would bring the subject to a fire district meeting, and under the supposition that the town furnish a good road in connection with the width was assigned for Saturday.

The case against the liquors and vessels of Richard Fowler and of Joseph Boyer of Canal street, selzed on August 13, were heard. He was given tacit assurance that the council would co-operote in the improved widening of the street. Mr. Phelus asked that the town take into consideration the formal accept-ance of the Misquomient road, as it was more of a main highway than several other roads in the vicinity. He was informed that the town had been chary about accepting these roads, for chary about accepting these roads, for once accepted they must be maintained, and that meant big increase of the once accepted they must be maintained, and that meant big increase of the town expenses. The Misquamicut road referred to is about a mile in length.

Mr. Phelps referred to the separation idea, and that perhaps a happy medium could be reached, provided the council would shift a portion of their burden upon the Watch Hill fire district commission. He hoped that something would be done that would result in harmony by the whole people of the town, which, of course, includes those at Watch Hill. Mr.

Deafness is caused by an inflamed condition of the murous lining of the Eustachian tube. When this tube is inflamed you have a cumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.
